Instructions

This Certificate is required for all travellers who have had COVID-19 within three months of intended travel to Nauru.

There are fewer COVID related requirements and travel restrictions for persons who have recently recovered from COVID-19. For example, no further COVID testing is required and there may be exemptions from requirements to quarantine, in relation to travel to Nauru.

If it has been more than three months since a person recovered from COVID-19, the normal requirements and travel restrictions may apply again.

A separate form is required for each traveller. Information must be provided in English.

The form must be completed by a registered Medical Practitioner (Doctor).

Submit the Certificate with copy of test results to Nauru Covid Taskforce or Nauru Airlines Reservations.
